

THE INSTITUTE OF PAPER CHEMISTRY  
APPLETON, WISCONSIN

December 10, 1947

Dear Dr. Lederberg:

Under separate cover, I am forwarding you 5 to 10 gram samples of methyl- $\beta$ -galactoside and raffinose. I understand from your letter of November 26 that these are the only materials available to me that you wish. No guarantee can be made of the purity of these products, and it would probably be best to crystallize both from water or aqueous alcohol before using.

I hope to have the pleasure of meeting you sometime, but I do not expect to be at the American Association for the Advancement of Science meeting in Chicago. If you are in our vicinity, we will be glad to see you here.

Sincerely yours,

  
Ward Pigman  
Research Associate
